

Latest innovations

Our researchers make Research and Development the main driver of growth and the leading force for innovation within the ArcelorMittal group. Here are some of the latest innovations we developed:

Amstrong® Ultra and Relia®, new ranges of high strength steels for heavy duty machinery.

The **S-in motion® Mid-Size Sedan project** identified the weight saving potential of advanced high strength steel (AHSS) on mid-size vehicles.

ArcelorMittal is the world's only producer of **A913 Grade 70 jumbo sections** for skyscrapers, providing higher yield strength, weight savings, and lower fabrication costs.

Dragon Estate® WIRE 2Life blends easily with its surroundings, and it is the market's longest-lasting green wire fencing.
