ArcelorMittal presents digitalisation projects to visitors at Stuttgart Blechexpo

Stuttgart, 8. November 2017.

ArcelorMittal is introducing its digitalisation projects at Stuttgart's Blechexpo – the international trade fair for sheet metal working - from 7-11 November 2017, with a particular focus on the digitalisation of supply chains.

“Projects include automated and digitalised order processing from the offer to the customer up to completion of the purchase, followed by online order tracking “, explains Antoine Van Schooten, chief marketing officer for industry and digitalisation at ArcelorMittal Europe – Flat Products.

ArcelorMittal has already taken key steps on the way to a digitalised supply chain including:

- SteelUser.com: the internet-enabled supply chain. From product guide, to order intake and online order tracking up to warehouse management, delivery and invoicing.
- Digital twin: the coil in the cloud – exchange of quality-related data with the customers.
- Inventory management with drones: autonomous drones with GPS navigation scan inventories. Inventory levels and availability are measured via video captures in real time.
- SteelAdvisor app: provision of up-to-date product data for customers.
- Track & Trace app: shipment tracking for logistical optimisation.

“Now we are working – together with our customers - to develop the existing opportunities of the digital supply chain and to introduce new opportunities and to create individual solutions”, said Rudolf Egbert, managing director ArcelorMittal Commercial Germany – Flat Products.

About ArcelorMittal

Germany

With a production volume of 8 million tonnes crude steel, ArcelorMittal is among the largest steel producers in Germany. Its customers come from the automotive and construction industry, as well as from the packaging and household appliances sector. The group runs four

large production sites in the country. These are two fully integrated flat carbon sites in Bremen and Eisenhüttenstadt as well as two long carbon sites in Hamburg and Duisburg. Moreover the group has seven steel service centers and 16 distribution centers in the federal republic. ArcelorMittal employs more than 9,000 people in Germany.

Worldwide

ArcelorMittal is the world's leading steel and mining company, with a presence in 60 countries and an industrial footprint in 19 countries. Guided by a philosophy to produce safe, sustainable steel, we are the leading supplier of quality steel in the major global steel markets including automotive, construction, household appliances and packaging, with world-class research and development and outstanding distribution networks. Through our core values of sustainability, quality and leadership, we operate responsibly with respect to the health, safety and wellbeing of our employees, contractors and the communities in which we operate.

For us, steel is the fabric of life, as it is at the heart of the modern world from railways to cars and washing machines. We are actively researching and producing steel-based technologies and solutions that make many of the products and components people use in their everyday lives more energy efficient. We are one of the world's five largest producers of iron ore and metallurgical coal and our mining business is an essential part of our growth strategy. With a geographically diversified portfolio of iron ore and coal assets, we are strategically positioned to serve our network of steel plants and the external global market. While our steel operations are important customers, our supply to the external market is increasing as we grow.

In 2016, ArcelorMittal had revenues of US\$56.8 billion and crude steel production of 90.8 million tonnes, while own iron ore production reached 55.2 million tonnes.

ArcelorMittal is listed on the stock exchanges of New York (MT), Amsterdam (MT), Paris (MT), Luxembourg (MT) and on the Spanish stock exchanges of Barcelona, Bilbao, Madrid and Valencia (MTS).
