

ArcelorMittal launches automotive app in Europe

Luxembourg, 9 July 2015 – ArcelorMittal, the world's leading steel and mining company, has launched a new and interactive app which makes the company's European automotive database of steel and coatings easily accessible to anyone with an Apple or Android smartphone or tablet.

"This app is a new way to browse the content of our existing automotive product catalogue," explains Francis Bugnard, Technical Director Automotive Europe. "It is fast, user friendly and, of course, mobile."

Designed for carmakers, tier-one suppliers, engineers, automotive designers, researchers and students, the app enables users to:

- Find steel products by specific automotive part and application
- Check which steel grades are the best-in-class for any automotive application
- Identify metallic and organic coatings for automotive applications
- Obtain detailed data on ArcelorMittal's products such as their mechanical properties and chemical composition, as well as information on welding, fatigue and impact strength
- Search our automotive product database
- Keep up-to-date with breaking automotive news from ArcelorMittal.

The Automotive app is available in English, French, German and Spanish.

You can download the app for free from the Apple Store or Google Play.

About ArcelorMittal

Europe
ArcelorMittal employs more than 100,000 people and produces approximately half of its total steel volume in Europe. With a presence in 17 European countries and around 400 different sites, ArcelorMittal Europe had revenues of €35 billion and a crude steel production of 43 million tonnes in 2014. We supply flat and long steel products for all major steel markets, including the automotive, construction, packaging and household appliances industry – supported by a leading R&D and distribution network with 9 laboratories and 1,000 full-time researchers in Europe.

Worldwide
ArcelorMittal is the world's leading steel and mining company, with a presence in 60 countries and an industrial footprint in 19 countries. Guided by a philosophy to produce safe, sustainable steel, we are the leading supplier of quality steel in the major global steel markets including automotive, construction, household appliances and packaging, with world-class research and development and outstanding distribution networks.

Through our core values of sustainability, quality and leadership, we operate responsibly with respect to the health, safety and wellbeing of our employees, contractors and the communities in which we operate.

For us, steel is the fabric of life, as it is at the heart of the modern world from railways to cars and washing machines. We are actively researching and producing steel-based technologies and solutions that make many of the products and components people use in their everyday lives more energy efficient.

We are one of the world's five largest producers of iron ore and metallurgical coal and our mining business is an essential part of our growth strategy. With a geographically diversified portfolio of iron ore and coal assets, we are strategically positioned to serve our network of steel plants and the external global market. While our steel operations are important customers, our supply to the external market is increasing as we grow.

In 2014, ArcelorMittal had revenues of US\$79.3 billion and crude steel production of 93.1 million tonnes, while own iron ore production reached 63.9 million tonnes.

ArcelorMittal is listed on the stock exchanges of New York (MT), Amsterdam (MT), Paris (MT), Luxembourg (MT) and on the Spanish stock exchanges of Barcelona, Bilbao, Madrid and Valencia (MTS).
