

Latest innovations

Our research teams make R&D the main driver of growth and a leading force for innovation within the ArcelorMittal group. Our latest innovations include:

Tectova® - a new organic non-slip coating with high scratch resistance, specifically designed to ensure the safe installation of roofs.

HyPer® - a new range of metallic-coated high strength steels which enable architects and builders to create efficient and cost-effective structures.

Granite® HD Xtreme - a new pre-painted steel, very durable and beautiful, for up to maritime-level protection.

RailCor® - a completely new range of corrosion-resistant rails which offer protection in severe environments.

Isis and **Creneo** - two new ranges of triangular and quadrangular profiles which give architects even more creative freedom.
